CAREER SUMMARY

Computer Science graduate with Distinction, focused on full-stack software development. Experienced in building and deploying web applications using TypeScript, React, Vue.js, Java, Spring Boot, Python, and SQL databases. Hands-on experience with REST APIs, authentication, CI/CD, and cloud deployment through independent projects and team-led development.

EDUCATION

Singapore Institute of Management-University of Wollongong Oct 2023 – Sept 2025
Bachelor of Computer Science Majoring in Digital Systems Security and Cyber Security (Double Major), Singapore

- Graduation Date: September 2025.
- Weighted Average Mark: 76.88 (Distinction).
- Achieved three high distinctions in **CSCI203 Algorithms and Data Structures, CSCI368 Network Security**, **CSIT328 Web Security**.

Singapore Institute of Management (SIM), Singapore Oct 2022 – Sept 2023
Diploma in Information Technology

PROJECTS

SignalBait — AI-Assisted Phishing & Scam Scanner Sep 2026 – Present
Vue.js, TypeScript, Tailwind CSS, Java, Spring Boot, Python, FastAPI, PostgreSQL, Hugging Face Transformers

- Developed a full-stack web application that analyzes suspicious messages using an AI-assisted classification pipeline, supporting both text and image inputs.
- Integrated the third-party **facebook/bart-large-mnli** model through **Hugging Face Transformers** for **zero-shot text classification.**
- Built **REST APIs with Spring Boot and FastAPI** to connect the frontend with backend and machine learning services.
- Implemented ticket reporting and tracking workflows, **including email notifications for ticket creation and status updates** using **Brevo.**
- Deployed the frontend and backend services using **Vercel and Render**.

SignalBait Admin Dashboard — Administrative Ticket Management System (Self-Directed Project) Sep 2026 – Present
Angular, TypeScript, Django, Python, PostgreSQL, ECharts, Tailwind CSS

- Developed an administrative dashboard to **manage user reports, update ticket statuses, and monitor ticket activity**.
- Implemented **session-based authentication** to restrict dashboard access to administrators.
- **Built analytics visualizations using ECharts** and an audit-log interface to review administrative actions.
- **Integrated Angular frontend components with Django API endpoints and a shared PostgreSQL database** used by the main application.
- Deployed the frontend and backend as separate services using **Vercel and Render**.

Urgent or Is It? – Cybersecurity Awareness Game (Self-Directed Project) Aug 2026 – Present
React, TypeScript, Next.js, NestJS, MongoDB, Tailwind CSS, Vercel

- **Developed and deployed** an independent full-stack cybersecurity awareness game using **React, TypeScript, NestJS, and MongoDB**, featuring interactive phishing-detection scenarios and persistent user progression.
- **Designed and implemented RESTful APIs** with NestJS and Mongoose for user registration, authentication, profiles, and **per-user game-state persistence**.
- **Implemented secure authentication and authorization** using **JWT, bcrypt password hashing, protected API endpoints, and DTO-based input validation** with NestJS guards and class-validator.
- **Built automated CI/CD workflows** with **GitHub Actions**, integrating production builds and deployment while configuring frontend-to-backend API communication across separate services.

Portfolio Website (Self-Directed Project) Jul 2026 – Present
React, TypeScript, Next.js, Vercel

- **Built and deployed** a production portfolio platform with **Next.js, React, and TypeScript**, applying reusable component architecture to create maintainable and scalable UI.
- **Implemented four-language localization** (English, Mandarin, Japanese, and Indonesian), enabling dynamic language switching across portfolio content.
- **Developed responsive and theme-aware UI**, incorporating **dark mode** and adaptive layouts for consistent cross-device usability.

Feb 2026 – Present

TreeVisual – Binary Tree Learning Tool (Self-Directed Project)
Python, PySide6

- Designed and developed a desktop application to visualize **binary tree traversals** with step-by-step simulation.
- Implemented interactive controls to demonstrate **preorder, inorder, and postorder** traversal logic.
- Built save/load functionality for structured tree data using **JSON**.
- Focused on **clean UI design** to improve conceptual understanding of **data structures**.
- Packaged and distributed the application with downloadable builds for demonstration.

Solo Participant | Nanyang Technological University x Base 3 Hackathon Aug 2025 – Aug 2025
Phish or Miss — A Phishing Awareness Game (React, Vite, Flask, AWS EC2)

- Designed and built a **full-stack web application MVP within 5 days** in a competitive hackathon environment
- Deployed application on **AWS EC2 with Elastic IP**, enabling reliable public access for live demonstration during hackathon
- Implemented frontend-backend integration using REST APIs
- Debugged deployment and runtime issues under time pressure to ensure stable demo delivery

Final Year Project Team Leader | SIM-UOW Jan 2025 – May 2025
AI-nteractive: Face Animated Learning Management System
(Flask, MongoDB, SadTalker API)

- Led a team of 5 to integrate **AI-driven video generation** into a custom LMS
- Optimized processing pipeline, achieving **~90% reduction in generation time** using ffmpeg
- Designed backend workflows and API integration for automated content generation
- Applied **Agile/Scrum practices** to manage sprints and coordinate development

Software Development Methodologies Project Team Leader Oct 2024 – Nov 2024
Car Loaning Management System (HTML, PHP, SQL)

- Led a team of 7 to develop a **full-stack web system** with authentication and loan calculation features
- Implemented **CI/CD practices** during development lifecycle
- Delivered a functional MVP within 5 weeks following agile principles

VOLUNTEERING EXPERIENCE

PPIS - Peduli Kartini Community Outreach Event May 2025
Logistics Assistant | Perhimpunan Pelajar Indonesia di Singapura (PPIS)

- Executed logistics support by distributing hampers and refreshments, and assisting participants in accessing legal and mental health services
- Collaborated with a team of 8 to coordinate setup and logistics for a 70+ participant community event

CERTIFICATIONS

- **JLPT (Japanese Language Proficiency Test) N3 –** ***Awarded 27 Aug 2026***
- **AWS Certified Cloud Practitioner (CLF-C02) –** ***Awarded 7 Aug 2025***
- **ISC2 Certified in Cybersecurity (CC) –** ***Awarded 29 Jul 2025***

SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript, C++, PL/SQL
- **Frontend:** React, Next.js, Vite, HTML, CSS, Tailwind, Angular, Vue
- **Backend:** NestJS, Flask, PHP, REST APIs, Django, FastAPI, Spring Boot
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Cloud & DevOps:** AWS (EC2, S3, CloudFront, Elastic IP), Vercel, Railway, Git, GitHub Actions, CI/CD, HTTPS
- **Practices:** Data Structures & Algorithms, OOP, Secure Coding, OWASP Top 10, Agile/Scrum, Debugging & Testing
